

I feel that the Level 3 Early Years course has given me a good insight and made me more aware of how early years settings are run. Placements gave me lots of practical experience but I felt more involved with things when I did a full week instead of 2 days a week.

At times the course was very mentally challenging and also very stressful. The tutors always gave a much more in depth informative explanation about what they were teaching. They were always very supportive and willing to give advice and encouragement.

Also if extra support was needed it was always available, they offered alternative ways of teaching and doing assessments which were suitable for all abilities.
